

Submission #10 to North Kawartha PAC

by Ambrose Moran Dated Feb 19 2009

Subject **Standard for Alternative Energy Standards**

Background

The Township Strategic Plan Encourages¹

1 residence and businesses to use alternative energy systems and construction methods

2) continue to implement energy conservation practices in municipal buildings and infrastructure

3) wherever possible to promote compliance with Official Plans and bylaws through the use of innovative environmentally sound sustainable practices

COMMENT

As society changes and adjusts to energy conservation, property development standards need to address emerging issues.

attached for information is Questionnaire for Zoning Bylaw Update- Central Frontenac Township.

RECOMMENDATION

That the PAC advisory committee determine

A) if County OP permits or other provincial or federal regulations , encourages or permits or restricts installation relating to private or public installation related to energy production.

B) best practices for municipalities to address issues related to potential installations of structures or systems associated with energy production and what resulting standards that need to be considered.
