**Subject:** North Kawartha State of Emergency Storm Debris Depot need

Carolyn

I am writing to you in your capacity as head of the Township Emergency Management Committee and ask that you share this with your committee members and others within the township who may be able to contribute.

This is a request that you and your Emergency Response committee establish a temporary site for residence on Jack Lake within NK can dispose of brush and large timber from their personal properties and also from private roads.

There are approximately 88 cottages located in this area and many.... but certainly not all.... have an immediate needs for the municipality to contribute to a cleanup solution.

Taking material to Anstruther Transfer station is not helpful for various reasons:

- Distance and time required
- Limited availability based on hours of operation as many property owners are not here all week.
- Restrictions on size of material allowed
- Many property owners do not have tow vehicle trucks or suitable trailers
- Bin capacity would not handle a fraction of need
- Challenges in depositing heavy material into tall bins

There is a massive cleanup required which will likely take a couple of years for certain properties. A cost effective and environmentally friendly solution for ratepayers to dispose of debris is urgently needed.

The situation on Jack Lake in Havelock Belmont Methuen is far more severe and that Township will also be asked to assist cottagers.

Many ratepayers are waiting to hear what to do with their brush etc while others have reluctantly dragged brush across their road to ditches which is both unsightly and potential fire hazard.

I have given some thought to candidate sites that you may consider

## Site #1

Privately owned site at corner of Fire Route 50 and 50A would be convenient to the neighborhood on South side of Sharpes Bay if arrangements could be reached between the property owners and emergency response team.

## Site #2

Another location not as preferred could be on **Crown Lands off Jack Lake** road per illustration below.

I am confident under the circumstances that MNRF would accommodate the need on a temporary or permanent program basis.

You may have other potential sites to consider. **I have not asked for or received input from anyone on these suggested sites at this point**

**Please acknowledge receipt provide a quick response** to this request as many are anxiously waiting to see what can be expected of our municipality under the current state of emergency.

A handwritten signature in cursive script, appearing to read 'Ambrose Moran'.

**Ambrose Moran** Acting independently in the interest of my neighbors
