Subject: Jack Lake Storm Damage

I have asked a few cottagers to send me pictures of damage on the lake and below is link to collection of those pictures.

<https://photos.app.goo.gl/BNJdymP34pW2Qow86>

It is my belief that it is a well kept secret the extent of destruction to structures, vehicles and trees around Jack Lake which I sense is the most serious in the whole storm path across Ontario ...but neither the media nor elected officials are aware of the situation and challenges facing cottagers is disposing of storm debris.

I and others are pressing the Mayors of North Kawartha and Havelock Belmont Methuen to assist cottagers in establishing brush depot close to neighborhoods to facilitate brush and tree disposal. I predict it will take up to 2 years of effort to restore certain properties and islanders have special challenges.

The storm was 3 weeks ago and so far our local municipalities are treating cottagers with mostly a "business as usual approach" to critical disposal programs.

Possibly this collection of photos will catch the attention of our elected officials as I doubt if they are aware of the major undertaking required to clean up and repair properties and landscape.
