Subject: Proposed Jack Lake South Tower

Good afternoon Ryan

I understand you are involved with cell tower site selections in the Jack Lake area.

I am a resident on Jack Lake located at 239 FR 52 about 1 km from a North Kawartha Township site being considered for a new cell tower. I am also a Rogers cell customer.

This week I have been engaged with a large number of folks on Jack Lake exchanging information and views about the process of tower selections and how we can work with those involved to find a solution which is acceptable to this most directly affect by a site selection while also encouraging Rogers to improve cell services which is needed.

I have posted on web site www.ApsleyWatch.com --→ cell service certain information to keep a large number of folks aware of developments and have not been an active participate in the toxic debate being advance by Face Book which I would prefer to see toned down to allow the more productive involvement with the objective of finding a solution which is acceptable to most and ideally all. There are lots of unknowns about tower design options ..lighting...proposed service areas etcwhich make it difficult to understand the impact of a new neighborhood tower in order to provide meaningful input.

This is a request to have a meeting with you and possibly another associate asap. I assume you are working in this area, and we could meet at my place 239 FR 52

I am available either tomorrow or Monday at this point or even this weekend. My number is 705 656 2000

Note

After considerable frustration was eventually advised by Rogers that Ryan Williams is no longer with Rogers despite this is the contact person listed on North Kawartha web site.

I did eventually connect with Ryan... he confirmed he is no longer with Rogers and he is involved through another company establishing cell sites and actively working on potential sites on Jack Lake in Havelock Belmont Methuen twp but not involved with the Jack Lake South location in North Kawartha
