## **Comments to Province**

Despite advances in graphics technology I have not seen any improvement in accuracy just more colorful errors.

Shoreline on land use schedules appears to have a strip of land adjacent to waters in a different designation which is a mistake and seems to reflect the original shore road allowances.

## **Recommendation to MMAH**

That graphics on land use schedule and possibly others be refined and incorporated in the final version prior to approval by Minister Clark

A handwritten signature in black ink, appearing to read 'Ambrose Moran', with a large, sweeping initial 'A'.
